

Rezolve Ai Unveils New SQD Revenue Model Backed by Enterprise Customers

December 29, 2025 1:00 PM EST

Enterprise customer payments to support data infrastructure growth

NEW YORK, Dec. 29, 2025 (GLOBE NEWSWIRE) -- Rezolve Ai (NASDAQ: RZLV), the leader in Agentic Commerce and AI-powered customer engagement, today announced the launch of **Revenue Pools** by its wholly owned subsidiary, **SQD Network**, designed to support increasing demand from large enterprise and institutional customers.

SQD provides high-performance blockchain data services to major global organizations, including **Deutsche Telekom** and top DeFi protocols such as Morpho and PancakeSwap whose platforms are designed to require continuous, large-scale access to real-time and historical data.

SQD's Revenue Pool model is designed to fund SQD's infrastructure capacity directly by **customer payments** as customer usage grows, reinforcing long-term sustainability and alignment between customer usage and economics.

What the Initiative Does in Simple Terms

- Large customers pay subscription fees to access its data services
- Delivering that service at scale requires committed infrastructure capacity by SQD
- SQD Token holders can temporarily lock their SQD tokens to help support that capacity
- While locked, tokens cannot be sold or moved but remain owned by the holder
- When customers pay, **a portion of those payments may be shared with the participants**, who are paid in stablecoins

In short, **customers pay for the service and those who help support it may share in the income it generates.**

Why This Matters for the SQD Ecosystem

As blockchain data becomes increasingly mission-critical across business operations, payments, analytics and enterprise systems, infrastructure economics matter.

SQD's Revenue Pool model introduces several dynamics that investors typically associate with more mature platforms:

- **Demand-driven token usage**, as tokens are locked to support live services
- **Reduced supply circulation** through temporary locking and protocol buybacks
- **Customer-funded operations**, rather than reliance on ongoing token issuance
- A clearer link between **enterprise adoption and underlying network activity**

Over time, these dynamics are intended to strengthen the relationship between SQD network usage and the role of the SQD token within that ecosystem; however, no assurance is made regarding future token performance.

Market Accessibility

The SQD token is currently tradable on a number of major digital asset exchanges, including **Coinbase** and **Binance**, which can provide liquidity and price discovery for market participants. Rezolve Ai does not sponsor, endorse or promote trading in SQD tokens.

Leadership Commentary

"As enterprise customers place more reliance on SQD's data services, it becomes essential that infrastructure capacity is supported by real usage and real payments," said **Dmitry Zhelezov, CTO of SQD Network**. *"SQD's Revenue Pools are designed to formalize that link between demand, capacity and network economics."*

"We believe public-market investors increasingly look for technology platforms where growth is supported by durable, usage-based economics," said **Daniel M. Wagner, Chairman and CEO of Rezolve Ai PLC**.

"This type of model is designed to reflect the direction in which we believe digital infrastructure is maturing toward greater discipline, transparency and alignment with real customer demand."

Designed to Scale with Demand

SQD's Revenue Pool launch begins with limited capacity immediately and is expected to scale progressively as enterprise customer usage grows. Existing customer incentive structures are anticipated to remain broadly stable during the transition.

By aligning infrastructure support with customer-funded economics, SQD is positioning its network to meet the long-term needs of large, established customers while reinforcing the economic foundations beneath that growth.

About Rezolve Ai

Rezolve Ai (NASDAQ: RZLV) is an industry leader in AI-powered solutions, specializing in enhancing customer engagement, operational efficiency, and revenue growth. The Brain Suite is the world's first enterprise AI platform built for Agentic Commerce, delivering advanced tools that harness

artificial intelligence to power search, transact, fulfill, and personalize at global scale. For more information, visit www.rezolve.com.

Forward-Looking Statements

This press release includes “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1996. The actual results of Rezolve AI plc (“Rezolve”) may differ from its expectations, estimates and projections and consequently, you should not rely on these forward-looking statements as predictions of future events. Words such as “expect”, “estimate”, “project”, “budget”, “forecast”, “anticipate”, “intend”, “plan”, “may”, “will”, “could”, “should”, “believes”, “predicts”, “potential”, “continue”, “design” and similar expressions are intended to identify such forward-looking statements. These forward-looking statements include Rezolve’s statements regarding its Revenue Pool model and launch, and the anticipated continuation of Rezolve’s existing customer incentive structures and involve significant risks and uncertainties that could cause the actual results to differ materially from the expected results. You should carefully consider the risks and uncertainties described in the “Risk Factors” section of Rezolve’s Annual Report on Form 20-F and its subsequent filings made with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Most of these factors are outside Rezolve’s control and are difficult to predict. Factors that may cause such differences include, but are not limited to: (1) competition, the ability of Rezolve to grow and manage growth profitably, and retain its management and key employees; (2) changes in applicable laws or regulations; and (3) weakness in the economy, market trends, uncertainty and other conditions in the markets in which Rezolve operates, and other factors beyond its control, such as inflation or rising interest rates. Rezolve cautions that the foregoing list of factors is not exclusive and not to place undue reliance upon any forward-looking statements, including projections, which speak only as of the date made. Except as required by applicable law, Rezolve does not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances, or otherwise.
